

Oxygenating Trio®

This advanced, pro-B vitamin-rich treatment paired with an oxygen-boosting application works to deliver oxygen into the skin while also fighting common signs of aging. The oxygen-boosting application provides quick and effective penetration, skin-plumping action, and a reduction of fine lines and wrinkles.

Key Benefits

- ✓ This formulation contains antioxidants and enzymes
- ✓ Leaves skin smooth, purified, and glowing

Key Ingredients

- + **Niacinamide (5%)** – a potent, yet calming antioxidant and form of vitamin B3 that helps reduce transepidermal water loss (TEWL) and improve barrier function. Additionally, it helps reduce redness, skin yellowing, and promotes an even skin tone.
- + **Panthenol (2%)** – a provitamin of B5 that helps restore barrier function and encourage post-treatment rejuvenation.
- + **Candida Saitoana Extract** – a type of fungi that encourages skin detoxification.
- + **Methyl Perfluorobutyl Ether and Methyl Perfluoroisobutyl Ether** – a unique ingredient blend that interacts with the water in the skin, leading to evaporation and oxygen production. These unique compounds react with other ingredients in the formula to infuse the skin with oxygen and encourage circulation.

Before

Condition: Acne and diffuse redness.*

After one treatment

Solution: Oxygenating Trio® and used Facial Wash Oily/Problem, Blemish Control Bar, Acne Gel, Rejuvenating Serum, Protecting Hydrator Broad Spectrum SPF 30, ReBalance.
