

Sensi Peel®

Sensi Peel® is a unique chemical peel option for all patients, including those with sensitive skin. This universal 6% TCA solution will improve surface texture and brighten the skin while helping promote an even skin tone. This multi-faceted and skin-brightening treatment is an excellent option for sensitive skin and higher Fitzpatrick skin types.

Key benefits

- ✓ Improves surface texture and brightens skin
- ✓ Promotes an even skin tone
- ✓ Reduces the appearance of fine lines and wrinkles

Key ingredients

- + **Lactic Acid (12%)** – an alpha hydroxy acid (AHA) that breaks down the bonds between cells (desmosomes) to allow for easier exfoliation of dead surface cells. It also hydrates the skin and inhibits melanogenesis by suppressing the formation of tyrosinase.
- + **Trichloroacetic Acid (6%)** – a superficial and medium-depth peeling agent that helps minimize the appearance of fine lines, wrinkles, and acne scarring.
- + **Alpha-Lipoic Acid (Thioctic Acid)** – a natural compound with antioxidant and anti-inflammatory properties that interferes with the internal pathways of hyperpigmentation.
- + **Emblica** – a botanical also known as Indian gooseberry or the Malacca tree. It contains a high concentration of tannins, which have been shown to reduce discoloration and the visible signs of aging.
- + **Silymarin** – a powerful antioxidant that provides anti-inflammatory benefits and has a protective effect against UVA-induced oxidative stress. It suppresses UVB-induced skin edema and the formation of sunburn cells.

Before

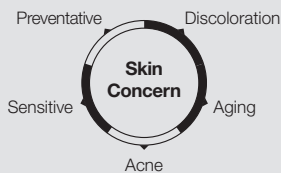

After three treatments

Skin Type

- Dry
- Oily
- Combination
- Normal
- Sensitive

Ingredients

Alcohol Denat., Hamamelis Virginiana (Witch Hazel) Water, Lactic Acid, Trichloroacetic Acid (TCA), Alcohol, Water/Aqua/Eau, Glycerin, Citrus Limon (Lemon) Peel Extract, Silybum Marianum Extract, Thioctic Acid, Emblica Officinalis Fruit Extract, Sodium Hyaluronate.
